**Strategic Planning Question**

1. What are LOPL current services and operations?
2. What services and operations not currently provided by LOPL should be added in order to better serve our community?
3. What resources are currently assigned to each service & operation? What resources would be required for a new service(s) and/or operation(s), not currently provided by LOPL?
4. What are service and operation priorities, both current and any newly proposed, as ranked by key stakeholders?
5. What are comparable exemplar services and operations that can serve as benchmarks for LOPL services & operations as ranked by stakeholders?
6. What actions should LOPL take to align services and operations based on stakeholder priorities and with exemplar practices?

*Adopted by the LOPL Regional Board – September 18, 2018*
